- Stackable credentials
- Partnerships

Community of Care

- Evaluate and rework processes
- Centered on equity
- Partnerships

Job Skills Program (JSP) – State Summary

All JSP Grants (2021-23 Biennium)	Totals & Averages
Total number of projects completed	118
Total number of training courses provided	1,204
Total number of employees trained	8,163
Average grant expenditure per trainee	\$1,709
Average total grant expenditure	\$127,484

American Structures, Sumner WA

Mike Hagen, CEO

“The JSP grant was instrumental in helping us achieve multiple corporate goals over the last year. One of the biggest achievements was our successful move into our new production facility. We used JSP funds to help train our workforce in lean manufacturing and continuous flow techniques. The advance planning allowed our company to move efficiently and hit the ground running in a very short amount of time.”

Technical Tooling Company, Tacoma WA

Jake Matthaei, Owner

“The Job Skills Grant program allowed our business to provide foundational training in several key areas... As a result, our business has just received our second year AS9100 D Audit re-certification, a distinction that has allowed us to acquire new customers and win new contracts that we otherwise would not have been eligible for... We have seen key operational improvements in not only workflow, but also improved culture and approaches to business processes.

We thought it was pertinent to invest in these areas while we are small, so that as we grow, we are doing so in the right way and with the right behaviors. Since beginning with the JSP Grant program we have grown our top line by over 300% and expect to double our current pace in the next 12 months.”

CPTC's Male Engagement Center

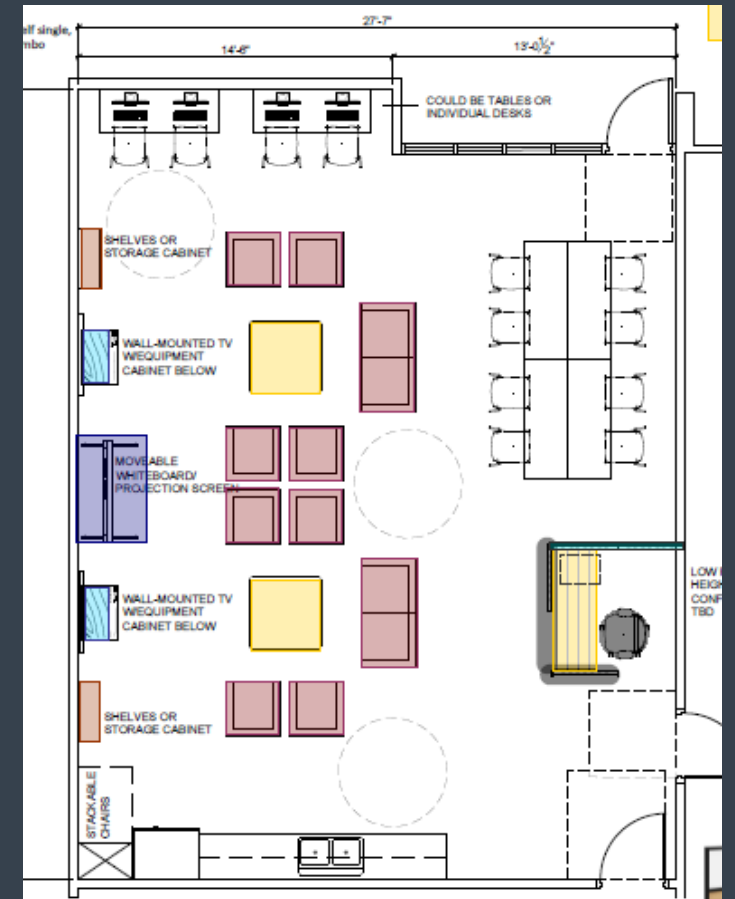

Jovan McCoy, Manager of Inclusive Excellence & Belonging

Foster a more inclusive culture of care built on trust and belonging for our current and prospective Black-identifying male students, resulting in higher generational social and economic mobility.

Going Forward

By starting small and dreaming big, together we will build a strong foundation that is scalable. We will envision solutions together when we encounter systemic barriers and build an equitable approach for student success.
